LEAN SIX SIGMA TRAINING OPPORTUNITIES

Lean Six Sigma Assessment

In this four-hour session, Training Logic will assess your organization's operations and processes. The assessment will identify strengths and weaknesses of current processes and recommend appropriate and impactful solutions.

6S: A Good First Step of Lean

This four-hour session uses the principles of Six Sigma (6S) to reduce waste, improving the quality of your organization.

Creating Six Sigma Safety

Learn to apply and align Six Sigma principles to your safety processes and procedures, and explore safety pathways to support an incident-free culture in this four-hour session.

Creating Flow - Cellular Design

This session teaches you to create flow and eliminate waste so your product can move through your facility with minimal motion and less handling by employees.

Poka-Yoke for Employees

Removing all potential causes of error is the concept of Poka-Yoke. This four-hour session reviews how you build quality into processes, provide simple solutions, eliminate human and mechanical errors and create positive bottom line results through eliminating defects.

Poka-Yoke for Leaders

Focused on removing all potential causes of error, Poka-Yoke for leaders provides you with the background and skills to lead mistake proofing efforts. It also teaches you to assist employees in solving problems on the floor by applying the Poka-Yoke principles.

Quick Changeovers

Reducing or eliminating changeover time is a key step in meeting customer demands for high-quality, low-cost products that can be delivered at optimized profit levels for organizations. This four-hour training gives you a new process that will create low-cost or no-cost solutions to reduce current changeover time.

Total Productive Maintenance (TPM)

This team-based effort is designed to improve output quality through equipment care and overall equipment effectiveness. This four-hour session reviews TPM principles and establishes early equipment management and maintenance prevention progress.

Value Stream Mapping (VSM)

See the flow of products or services in this four-hour session. VSM identifies specific activities to help you streamline production, allowing you to cut lead times and reduce operating costs.

Pull Systems

This four-hour training reviews the principles of pull systems, which control the flow of resources within a production process by replacing only what has been consumed.

The Role of Lean Leaders

You can initiate and support a Lean Culture by learning the roles and responsibilities of a Lean Leader. By attending this four-hour session, you will identify organizational initiatives necessary for Lean Implementation, discuss solutions to barriers of Lean success and ensure Lean process support.

Creating Six Sigma Results for Employees

Employees are key in creating a healthy bottom line for your organization. In this four-hour session, they will learn the definitions of organizational efficiency and effectiveness, plus their roles in improving organizational efficiency.

Training Logic Inc.

Eliminating MUDA

MUDA, or eliminating waste, is critical in creating high-performing teams. Your employees will learn to differentiate between value added activities and non-value added activities, define criteria for valued added activities and recognize waste.

Six Sigma Management Philosophy

Not only will you develop a road map for data collection, decision making and implementing improvement initiatives, this eight-hour session will show you how to perform at near perfect levels, and focus on eliminating defects and tackling variations.

Managing MUDA for Lean Leaders

In this session, you will learn critical steps for managing MUDA while maintaining process improvement.

Kaizen Event

This “continuous improvement” event occurs over a five-day period. You will achieve real-time results with implementation occurring by the end of the week. Plus you will recognize additional opportunities for process improvement.

Training can be customized and delivered to fit our client's needs and work schedules.
